REGENERATIVE BLOWERS SV SERIES

Introducing the new Becker line of SV Series Regenerative Blowers

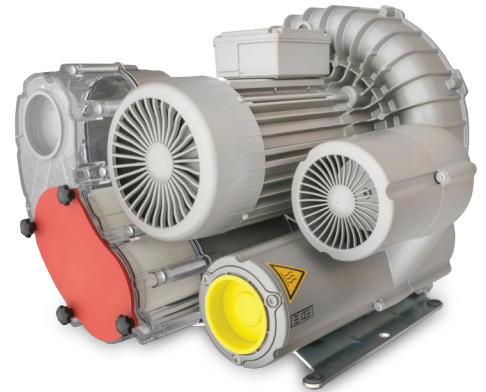

New Lower Price • Better Performance • Lighter Weight • More Compact Design

Our previous line of regenerative blowers has been replaced with our new **more efficient, compact, and cost effective** SV Series vacuum and pressure blowers. Becker has always offered the *Best in Class* single and two stage pumps in the industry and they've just gotten even better.

New Improvements

- Lower horsepower with greater capacities
- Higher flows: Single stage flows to 735 CFM
- Higher pressures: Two stage pressures to 213" WG
- Lighter weight
- New compact design

Smaller models come complete with integrated inlet filter and relief valve which means a clean impeller, cooler running pump and longer life. The exclusive clear filter/valve cover allows for fast visual maintenance inspection.

Features and Benefits

- Pressure or vacuum models
- Single and two stage versions
- Quiet running with built in silencers
- Rubber foot or pedestal mount for versatile installation
- Increased corrosion protection
- Sealed bearings eliminates greasing

SV Accessories

- Pump specific engineered noise reduction enclosures
- Pressure or vacuum relief valves*
- Clear cover inlet filters*
- Motor starters
- Hose and clamps

**Available externally mounted on Models 500 thru 1100*
